PROFILE

Software Engineer with experience building frontend and backend systems using React, TypeScript, Node.js, PHP and APIs. I also build AI-powered automation and GTM workflows, connecting data, business logic and CRM systems to turn real-world requirements into practical software.

SKILLS

- **Automation:** Clay, n8n, HubSpot API, webhook-driven workflows, ICP scoring, lead enrichment, CRM automation
- **AI & Data:** Claude API, LLM workflows, structured outputs, validation, JSON transformation, prompt design
- **Backend & Integrations:** Node.js, Express, TypeScript, JavaScript, REST APIs, PostgreSQL, AJAX, Companies House API
- **Web:** React, WordPress, PHP, HTML5, CSS3
- **Tools:** Git, GitHub, Postman, Google Tag Manager, Google Conversions API

FEATURED PROJECT

GTM Account Research Engine - AI-Powered GTM Automation | Node.js · TypeScript · PostgreSQL · Claude · Companies House · HubSpot · Clay · n8n

- Built an end-to-end full-stack GTM application using Node.js, TypeScript and PostgreSQL to verify UK companies via Companies House, apply ICP scoring and generate evidence-backed sales briefs with Claude.
- Integrated Claude, Clay, n8n and HubSpot using REST APIs and webhooks to automate prospect discovery, enrichment, research and CRM workflows.
- Implemented AI and data-quality guardrails and verified company identity before research data reaches the CRM.
- Tested the pipeline end-to-end with individual automated research runs completing in approximately 12–32 seconds.

EXPERIENCE

Full Stack Web Developer | Milani Electric and Solar Pvt. Ltd. | Jan – May 2026

- Owned development and deployment of a production website, working directly with stakeholders to translate business requirements into practical technical solutions.
- Built a backend lead-capture system using AJAX and a custom database table to reliably collect and persist website enquiries.
- Integrated Google Tag Manager and Google Conversions API to support lead tracking and conversion measurement.
- Designed a 3-tier geolocation system (IP detection → postal-code fallback → Haversine distance) to route visitors to relevant regional content.
- Programmatically generated 100+ city/service pages using custom post types and rewrite rules, reducing location-page setup effort by an estimated 60%.
- Implemented JSON-LD structured data for local SEO and supported scalable, conversion-focused website experiences.

Software Developer (Frontend) | Compunnel Software Group, Inc. | Jul 2022 – Jan 2023

- Built and enhanced reusable TypeScript/React components for a client-facing platform, working with structured API-driven data across interconnected views.
- Queried and consumed REST/API data, transformed JSON objects and mapped data into reusable application workflows.
- Diagnosed UI and data-flow issues across interconnected application states and collaborated with testers, designers and project managers to deliver fixes and features.
- Applied WCAG 2.1 accessibility standards to improve usability across client-facing experiences.
- Wrote unit tests using Jest and Enzyme and tracked delivery through Jira.

Coding Mentor – Web Development | WhiteHat Education Technology Pvt. Ltd. | July 2020 – July 2022

- Delivered structured remote learning content on HTML, CSS, JavaScript, REST APIs and CRUD via a game-based learning platform; guided students in building accessible, interactive projects and integrated AI-assisted development workflows and automation tools into the curriculum.

Program Associate | Channelplay Limited | March 2018 – March 2019

- Managed client projects for global retail brands including Adidas and Hublot, coordinating mystery-audit and retail-execution activities across multiple locations.
- Coordinated with external auditors, Collected and consolidated audit data in Excel, identified recurring operational issues and translated findings into client-facing insights.
- Prepared quality-check reports and presentation decks summarising trends, findings and recommendations for clients.

Frontend Intern | IBM India Pvt. Ltd. | June 2016 – July 2016

- Designed and delivered responsive landing pages for Vodafone product campaigns, applying mobile-first design principles

Career Break | 2023 – 2025

EDUCATION

- B.Tech ECE — NorthCap University, Gurugram, India | 2014 – 2018 | CGPA 7.31
